SKILLS

- Adaptable and calm

- Excellent communicator and listener

- Team player, and self motivated

EDUCATION

BA (HONS) MUSIC PERFORMANCE

Leeds College of Music

2015

INTERESTS

I love listening to and creating music! I also enjoy watching films/TV and going out into nature either on my bike or on a walk!

PROFILE

I'm currently enrolled at Command Shift (formerly known as Manchester Codes) retraining to be a software developer. I love creating things, solving problems and learning, so I'm really enjoying the process of coding and solving a problem with something I've made!

EXPERIENCE

TRAINEE JUNIOR SOFTWARE DEVELOPER

Command Shift

Oct 2022 - Present

On the course we are learning how to build software using best practices and modern tech stacks. HTML, CSS, Git, JavaScript (ES6) and TDD principles using JEST and Node.

Here are selection of some of the projects I've been working on:

- Portfolio - My first project/website that introduces myself built with HTML and CSS. It uses CSS grid and flex box for the layout, and imports fonts from google; as well as different media such as images and iFrames.
- Virtual Pet - My first object oriented programming project using TDD with JEST and Node. It creates a pet (object) that you have to look after using functions within the object! Currently exists on CLI, but with plans to add a GUI and more functions to the pet!
- Cruise Ships - Another object oriented programming project, this time with more than one object interacting with another, also uses TDD with JEST and Node. It creates a ship with an itinerary of ports to call at, the itinerary creates instances of the ports for the ship to call at! Currently exists on CLI, but I'm currently adding a GUI!

TEACHING ASSISTANT

John Jamieson School & Gledhow Primary School

2017 - Present

- Keeping up to date with policies (child protection, first aid, data protection) and taking part in any relevant training
- Honed my communication skills and patience as I'm working with young children, and some children that might not be able to communicate verbally
- Keeping a cool head in a fast paced and ever changing environment
